

# Soar.Earth Upload Guide

A simple, step-by-step guide on how to upload your awesome maps and images to Soar.Earth for the world to see. To upload, follow along with the steps and images below:

1. Register for a free Soar.Earth account. You can sign up in seconds using this [link](#).
2. Once you're logged into your account, go to the [upload tab](#) and select the appropriate option for your image type: Single Drone Image or Aerial, Satellite and Customised Maps.
3. Drag and drop your imagery into the upload box or upload with the 'Choose File' button.
4. Give your image a detailed title, description and tags - this will help others discover your content in search results.
5. Choose the category that best fits your image: satellite, aerial, drone, topographic, elevation, or other.
6. If you agree to the [Terms of Service](#), click the checkbox and then click the 'Upload' button.

Upload

Single Drone Image

Formats supported: JPG or PNG  
Top down drone images

Aerial & Satellite Images, Mosaiced Drone Images or Customised Maps

Formats supported: GeoTIFF, ECW  
Most common projections supported

3

Choose GeoTIFF or ECW

Drag and drop your file here  
or

CHOOSE FILE

Formats supported: GeoTIFF / ECW  
Most common projections supported (WGS84/UTM/Local Grids)

Soar has been optimised to accept visualised flat raster images. This includes satellite, aerial and drone images, as well as maps such as those found on topographic and geological maps.

Whilst Soar can also show elevation images, we currently can only visualise RGB values in GeoTIFF elevation files. Stay tuned for more features!

6

Confirm Upload

By submitting this map/image you agree that the content is your own work and/or you have right to the publish this content.  
For further information refer to our [Terms of Service](#)

UPLOAD

Step: 4/4

Your upload is now complete! However, it will still require approval from a moderator to ensure it meets our [Content Guidelines and Standards](#). This may take only a few moments, but can take up to 24 hours.

Once your content has been approved by a moderator, you can view it in your dashboard. Simply go to your dashboard, and select 'My Imagery'. You'll see all of your uploaded maps, including rejected items.

If your image was rejected, it'll be returned with moderator feedback to explain why it wasn't posted. If this happens, simply click on the 3 dots in the top right corner and select delete. Once you've made any necessary modifications, you can re-upload.

Need further help? Watch our [video tutorial](#) showing how to upload content on Soar.Earth or find more resources on our [Help page](#).
